

CAMOUFLAGE

Fashionable patterns and fabric textures seek inspiration in the world of nature. Get camouflaged and conquer the urban jungle.

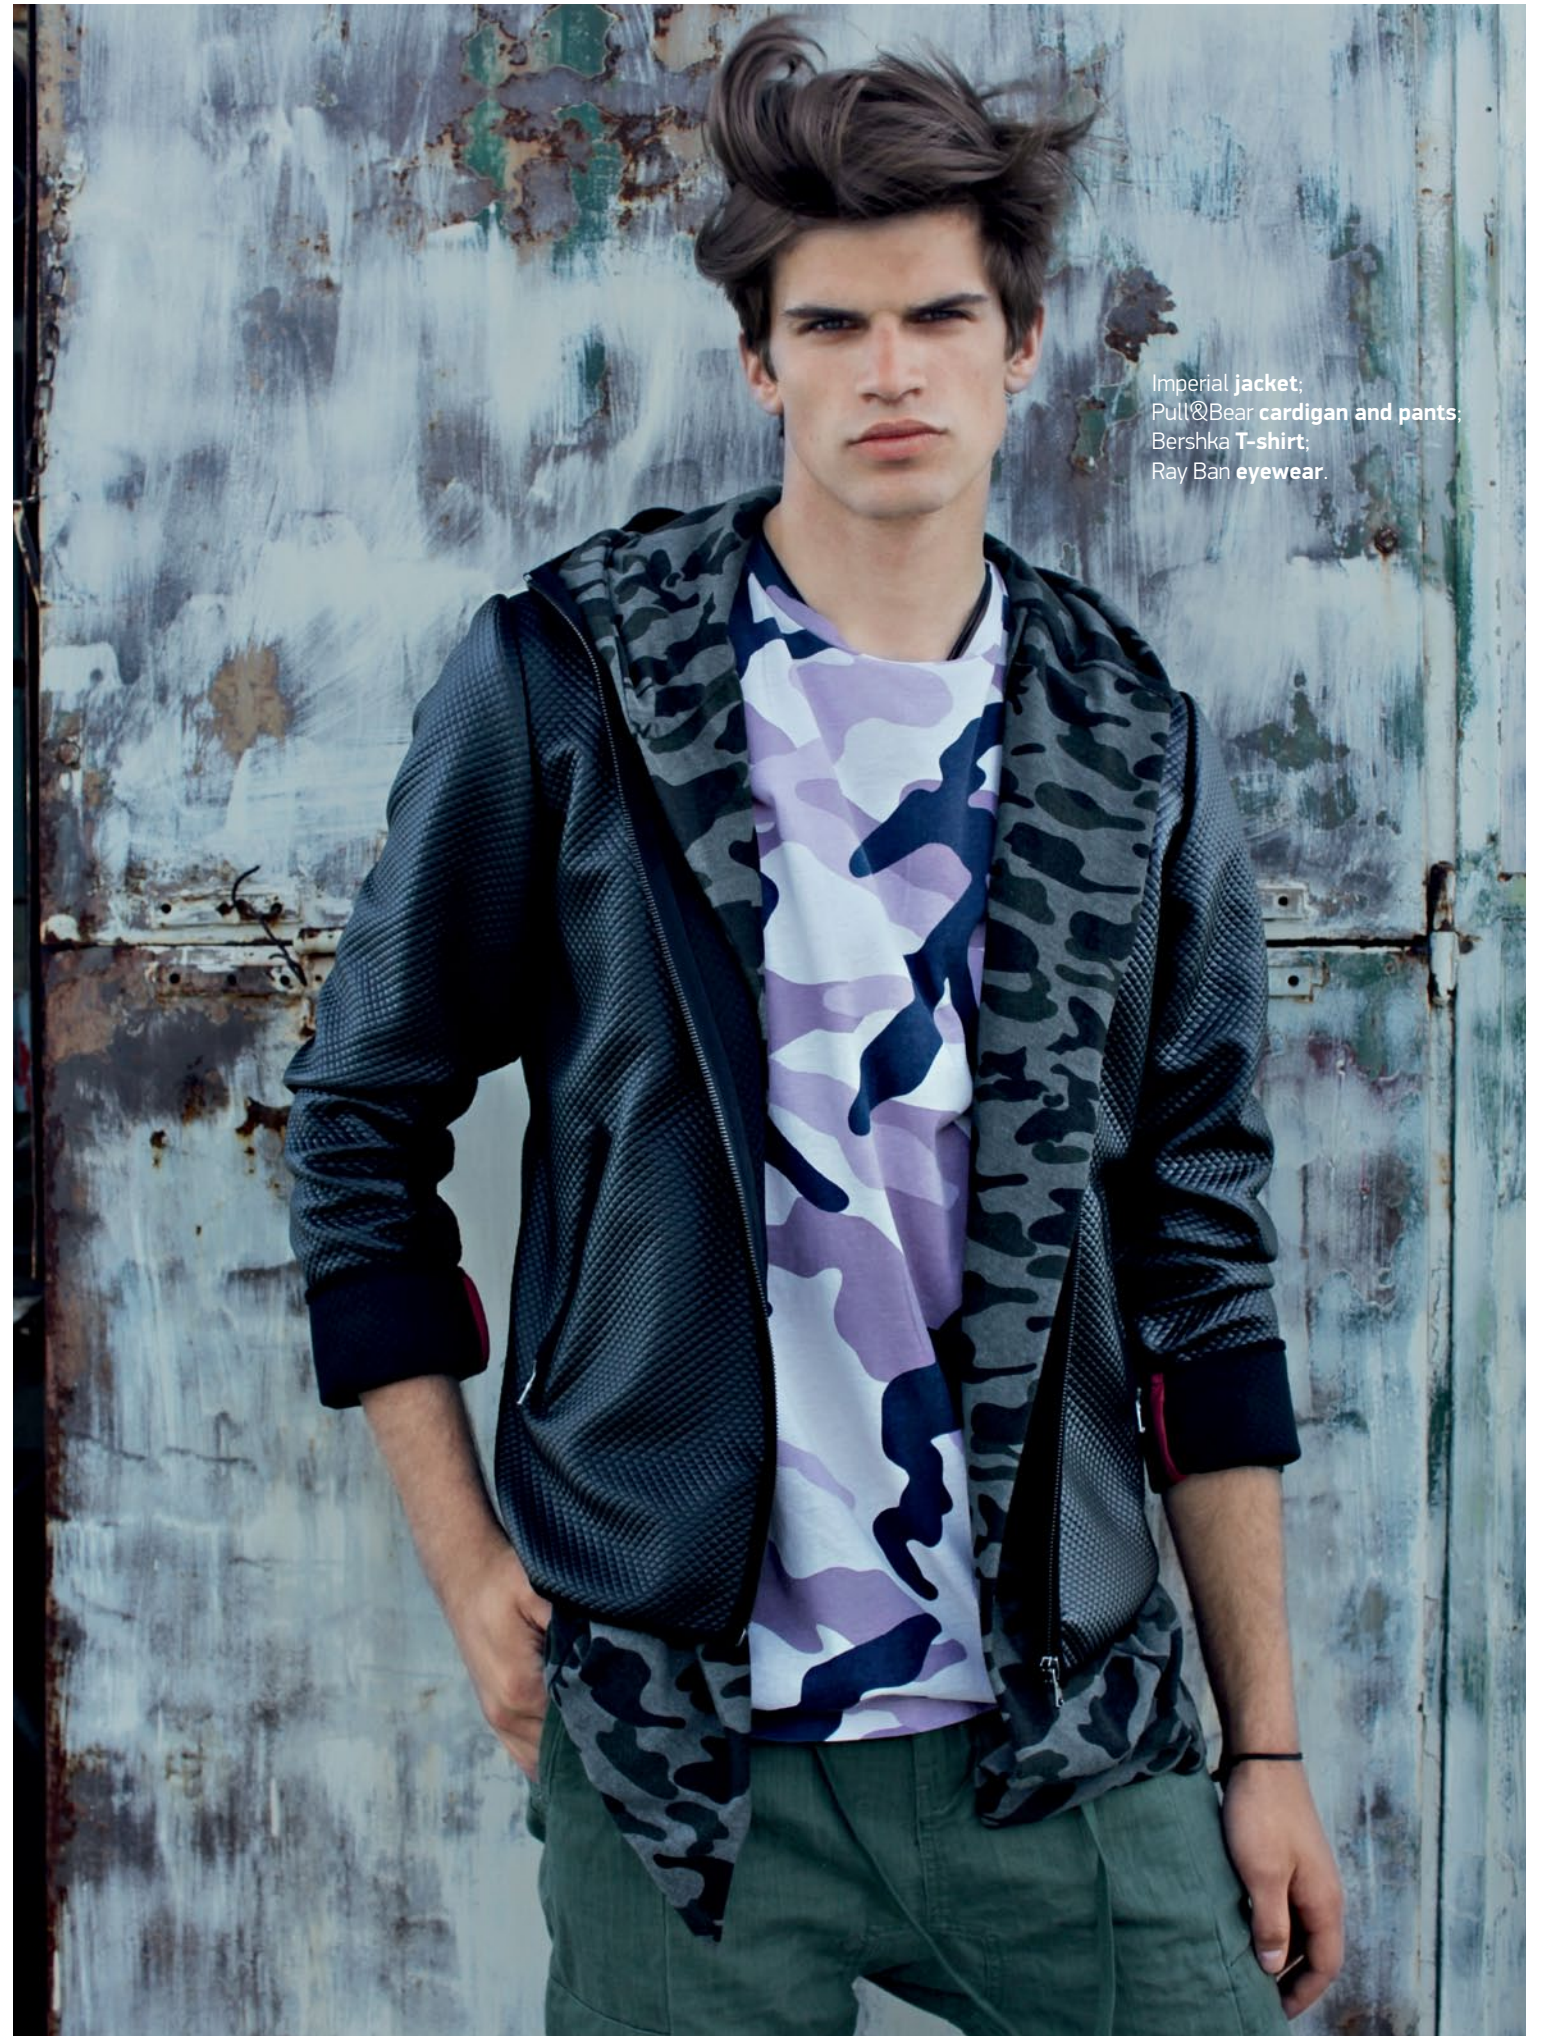

In a modern man's wardrobe, camouflage patterns, prints and materials that bring to mind the natural world remain immune to shifts in fashion, and are therefore always at the forefront, regardless of the season. Camouflage patterns will work in the summer and fall, coupled with bright colors and always-popular jeans. Even when paired with a color like sand, camouflage remains a top choice for stylish, urban looks, inspired by the trends from the street. The classic men's color palette--green, gray, brown--recalls uniforms, which speaks in favor of camouflage. If you find these patterns a bit too bold for your taste, try to integrate them in the form of accessories. A classic blue suit will be kicked up a notch if paired with a camouflage backpack, elevating your style in a fashionable, unconventional way.
